£62 MILLION TO PUT SCOTLAND IN THE FAST LANE OF THE INFORMATION SUPERHIGHWAY

Scottish Education received a £62 million hi-tech boost today when Scottish Education Minister Helen Liddell announced a package to help build the National Grid for Learning throughout Scotland over the next three years.

Mrs Liddell announced the funding together with the strategy document implementing the National Grid for Learning in Scotland, during a live video-conference link with the Prime Minister.

Mrs Liddell was visiting Deans Community High School at the launch of West Lothian's £5 million CREATIS project - a scheme to provide schools, libraries and community centres in West Lothian with a communications infrastructure. During her visit Mrs Liddell took part in a live link-up with Scalpay School where the Prime Minister was launching the local learning network for the Western Isles.

Mrs Liddell said:

"The National Grid for Learning will transform education in Scotland. Building the Grid and training people to use it will ensure that schools, colleges and public libraries play a key role in the development of an information based society and fulfils yet another of the promises we made to the Scottish people. Today I am announcing the investment of £62m of pounds to help children throughout Scotland now and for generations to come.

"Local projects like CREATIS in West Lothian and the network in the Western Isles are the elements which will link-up to form the National Grid. Modern technology means that geographical remoteness is no obstacle in terms of gaining access to the widest possible and most up-to-date information sources available. Today, Scalpay School and Deans Community High School in Livingston demonstrated just how a small primary school in the Western Isles and a large secondary school in the Central Belt will have the same access to high quality material and international contacts.

"To further develop the Grid in Scotland I am today allocating £62 million to be made available to local authorities for projects which contribute to the extension and improvement of the Grid. To help guide that development I am also today publishing a strategy document, Implementing the National Grid for Learning in Scotland, which sets out the Scottish vision of how the Grid will evolve in Scotland and how the development will be based on partnership between Government, local authorities, libraries, teachers, parents and other agencies. Scotland has today moved closer to the creation of a knowledge based economy for the 21st century"

BACKGROUND

1. The National Grid for Learning (NGfL) is both:

- a development of high quality educational material which will be available on the Internet to schools, colleges and libraries, teachers, lecturers, pupils, students and other learners; and

The National Grid for Learning (NGfL) is both:

- - a development of high quality educational material which will be available on the Internet to schools, colleges and libraries, teachers, lecturers, pupils, students and other learners; and
- - a programme for delivering the infrastructure of cable and networks, the hardware, the services and the training required to establish a modern, comprehensive information and communications technology system for all our schools, colleges and libraries.

for teaching

and for collaborating

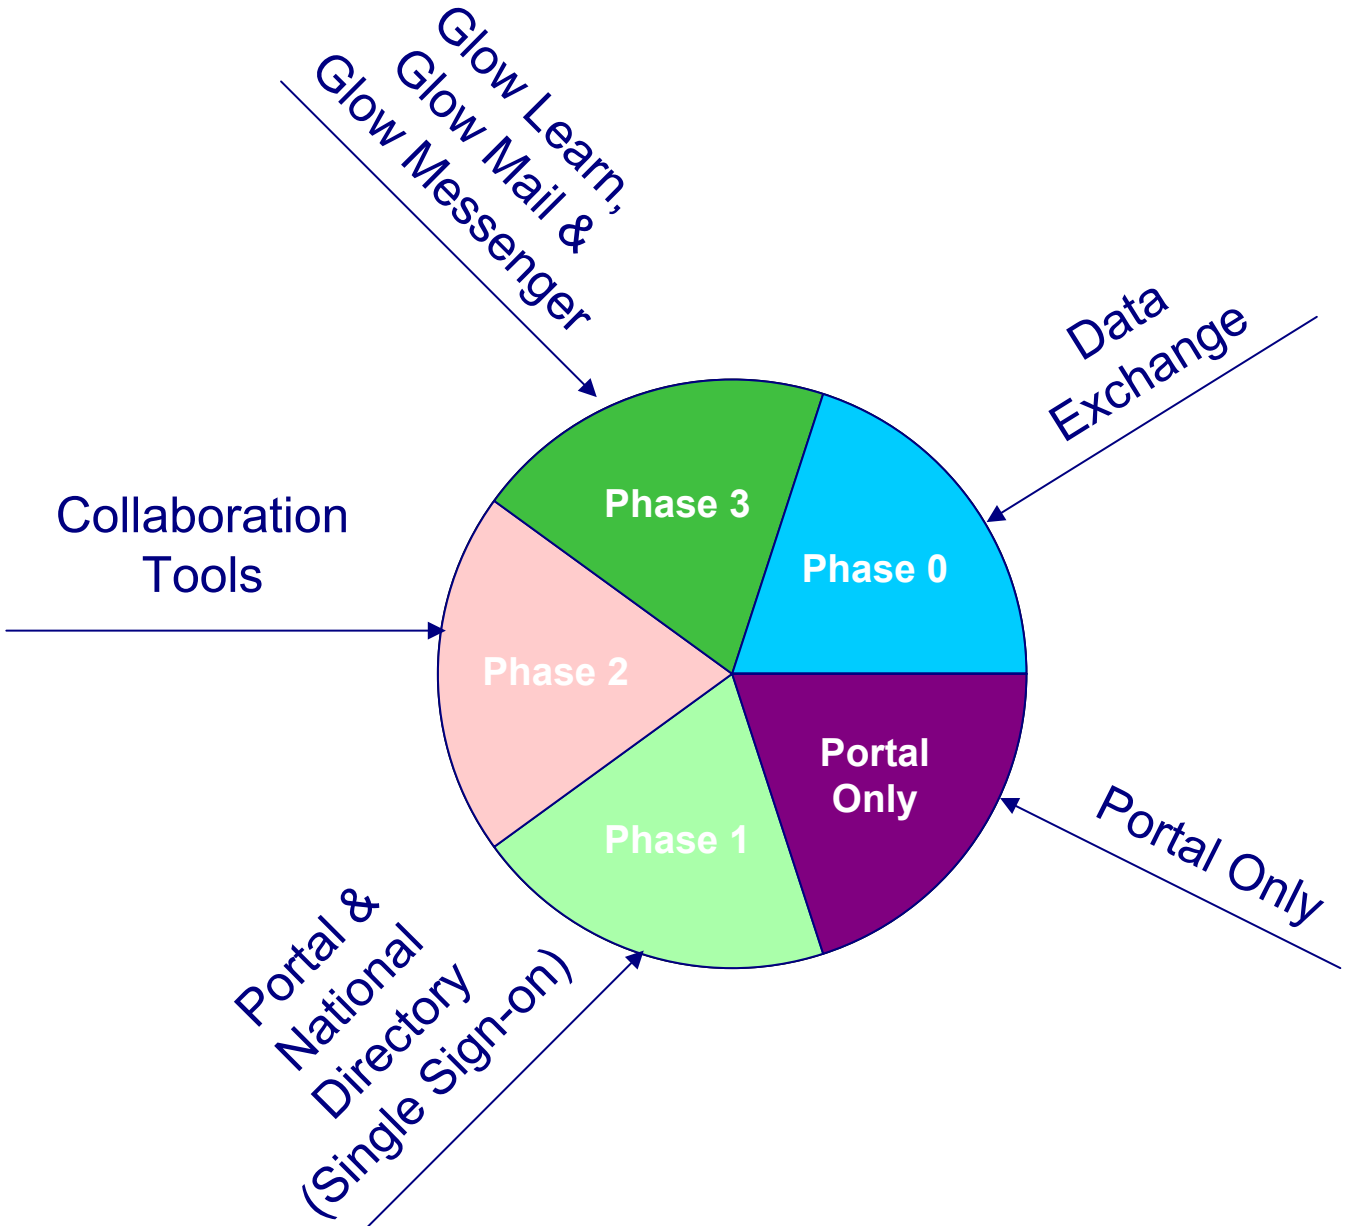

glow

Glow Contract

- Sept 2005 - Scottish Executive Education Department (SEED) and RM
- 5 Year Programme, £37.5M
- Milestone Payments/Monthly Service Charge
- Services available free to users - mid 2007
- Most ambitious education project anywhere in the world
 - ✓ 1.5M users
 - ✓ Engagement with 32 Local Authorities, SQA & TEIs, LTS, HMIE, SEED, etc
- Glow brand launch at SETT '06
- Major Glow focus at Scottish Learning Festival – Sept 07

Piloting

Piloting

- **Phase 0 (completed) March 2006**
 - 28 out of 32 local authorities participated
- **Portal Only Pilot (completed) Jun 2006**
 - 3 local authorities
 - first use by pupils, teachers and administrators

Piloting

- **Phase 1 Pilot (completed)** **December 2006**
8 local authorities + 600 Mentors participated
Portal plus other available components tested
- **Phase 2 Pilot (completed)** **Mar - May 2007**
14 local authorities + 600 mentors participated
Portal plus collaborative applications
- **Phase 3 Pilot** **May - June 2007**
14 local authorities + 600 mentors
Portal plus collaborative apps plus VLE, Mail
Delivery pilot into first local authority (Dundee)

National Helpdesk

Service from November 2005

- Pilot service and facilities in Nov '05
- Helpdesk personnel mobilised early to assist LA and Stakeholders through consultation, pilot and deployment phases
- Helpdesk will be conduit for all Glow users
- Integration into existing RM Bellshill support operation
- Response, Progression and Escalation Glow processes development

Scottish Cup

by Vernon Butler

15/09/2006 16:56

Good luck to the school rugby team as they meet RHS, current Scottish Cup holders on

Glow includes:

- a national directory and authentication system
- a national virtual learning environment (VLE)
- collaborative software applications
- support services

**It's the start of a long and challenging process!
Believed to be the largest system of its type.**

Glow includes:

a national directory and authentication system

- designed to permit secure access to services by all categories of user
- 800,000 users to include:
 - school & authority staff
 - pupils (5-18)
 - support staff in schools
 - relevant authority staff
 - TEI staff and students
 - others as appropriate

single sign-on to all applications

Glow includes:

social software

- e-mail
- video conferencing & virtual whiteboards
- chat rooms
- video streaming
- instant messaging
- Presence
- mailing lists

Will be possible to integrate other applications in time (Web 2).

Glow includes:

a national virtual learning environment (VLE):

using the VLE, teachers will be able to:

- prepare, review & plan lesson material
- assign lessons & courses to individuals or classes
- create tests & tasks
- create mark books
- create & assign homework to groups or individuals
- manage coursework
- Import/export content packages (SCORM 2004)

Anytime anywhere access.

Glow includes:

support services

- engagement & consultation
- supporting local authorities

- A partnership between LTScotland & RM = SSDN team

- professional development for teacher
- technical support
- support to develop use
- dedicated teams
